DETAILED ACTION

Response to Arguments

Applicant's arguments filed 7/6/07 have been fully considered but they are not persuasive.

Page 14, first paragraph:

The applicant argues that Dureau does not meet the limitation of access site information furnishing means for determining whether access site information corresponding to said detailed information furnishing means has been registered, and for furnishing said access site information if said access site information has been registered. As Dureau teaches a system wherein information is sent to the receiver, the information indicating whether the content is trusted (figures 4 and 5), this is interpreted as being equivalent to the limitation as whether the content is trusted is information corresponding to the content.

The remaining arguments deal with the same grounds as the above argument and are therefore considered addressed.
